

A quick overview of CES at the University of Surrey

Prof Richard Murphy

rj.murphy@surrey.ac.uk

Frameworks for Sustainability: *Planetary Boundaries, Natural Capital, Industrial ecology/Circular Economy, 'Absolute Sustainability'.....*

**Systems Analysis for Environmental Impact
Material & Energy Flows**

CUSP: Sustainable Economy and Prosperity

Social and ethical dimensions of SD transitions

Material Flow Analysis

Environmental Input Output Analysis

Social Value Chain Analysis

Energy Analysis

Economic Value Chain Analysis

CECAN: Complexity Science & Models for Policy analysis

Life Cycle Assessment

Carbon Footprinting

Decision Support

Novel Problem Structuring Techniques - Stakeholder engagement, participatory approaches

Multi-Criteria Decision Analysis

A potted 'history'

- **Founded 1992 by Prof Roland Clift, 30+ yrs of experience**
- **We conduct multi- and inter-disciplinary research and teaching in all aspects of sustainability**

Key drivers for us:

- **Work with local, regional and international partners**
- **Offer state-of-the art training at BSc (launched this year!), MSc and PhD levels and CPD courses**
- **Collaborative, engaged staff etc (~ 75 persons)**
- **Partners in the University of Surrey's IfS**

**Institute for
Sustainability**
UNIVERSITY OF SURREY

CES and CREST

- **Founders of CREST with Terry, Carol and the team**
- **Support the awards with CES prizes**

Opportunities locally:

- **Talented, dynamic students keen to do projects with local organisations e.g. BSc ‘sandwich year’ (from 2025), MSc INTERNSHIP placements and Dissertation projects**
- **Research and other funding bids with academics**

Example

Engineering and Physical Sciences Research Council

British Geological Survey

Circular Economy for Transport Systems

CIRCULAR ECONOMY

An output from CENTS road mapping workshops, produced in May 2022 <https://bit.ly/3NDkr24>
